SUMMARY

U.S. Navy Veteran and Software Engineering graduate building backend development skills in Java and Spring Boot, with 10 years of operational experience including promotion to team lead. Focused on building practical financial software and actively developing full-stack applications.

TECHNICAL SKILLS

Languages: Java, Python, PHP, HTML & CSS

Frameworks & Libraries: Spring Boot, Spring Data JPA, Jakarta EE

Databases: MySQL

Tools & Practices: Git, GitHub, REST APIs, Agile / Scrum

PROJECTS

Personal Finance Aggregator | Java, Spring Boot, MySQL, REST API, HTML & CSS | In Progress

github.com/skitich518/aggregate

- Built a full CRUD REST API using Spring Boot and MySQL exposing endpoints to create, read, update, and delete portfolio holdings
- Designed a JPA entity model mapping Java objects to a MySQL database using Hibernate, eliminating manual SQL
- Integrated Finnhub API for real-time market data, dynamically calculating current portfolio value per holding on every request
- HTML frontend in progress to consume the API and display portfolio data visually

Portfolio Website | HTML, CSS

jasonschriner.com

- Designed and deployed a personal portfolio site featuring project showcases, technical skills, and a downloadable resume
- Integrated OpenWeather API to fetch and parse live JSON data, gaining hands-on experience consuming REST APIs and handling third party data

EDUCATION

Bellevue University | Bellevue, NE | *October 2025*

Bachelor of Science in Software Engineering | **GPA: 3.9**

Fulton Montgomery Community College | Johnstown, NY | *May 2009*

Associate of Arts

EXPERIENCE

Target | Lugoff, SC | *January 2016 – Present*

Warehouse Worker → **Lead Warehouse Worker**

- Promoted from associate to lead based on consistent performance and reliability over 8 years, independently managing a 14-person area with full autonomy
- Managed area to the highest percentage to Common Expectation out of 4 shifts in the building, with performance directly reflecting the degree of autonomy given to lead
- Served as the most consistent leadership presence across a 60-person department during an extended period of management absence, maintaining team stability and accountability
